6 Listen to computer audio via USB-DAC

① Install the Windows driver software

> **NOTE**
>
> The installation of the driver software is not necessary in the following cases.
>   • When you do not play back the music from a PC using USB-DAC of this unit.
>   • When using a macOS.
> The driver software cannot be installed correctly if your PC is connected to the unit by a USB cable. If the unit and your computer are connected by a USB cable and the computer is switched on before installation, disconnect the USB and restart the computer.
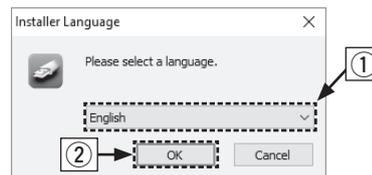

Windows OS

System requirements : Windows 10 or Windows 11

1 Download the dedicated driver from the "Download" section of the PMA-1700NE page of the Denon website (**www.denon.com**) onto your PC.

2 Unzip the downloaded file, and double-click the exe file.

3 Install the driver.
① Select the language to use for the installation.
② Click "OK".

③ The wizard menu is displayed. Follow the instructions on the screen.
④ When the wizard is completed, click "Yes".
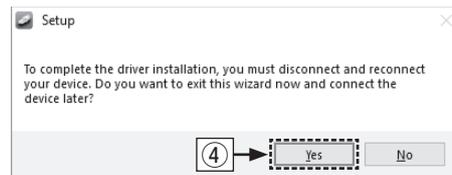

> **NOTE**
>
> Please see the FAQ at **www.denon.com** if you experience any issues getting audio to play from your computer through the PMA-1700NE. You may also want to check the support pages for audio player application.
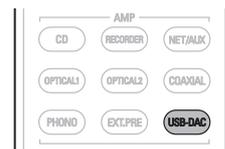

② Connect to PC or Mac

USB 2.0 cable
(Sold separately)

Type B

USB-DAC

Computer on which
the driver software
and audio player
software are installed

③ Listen to audio from PC or Mac

1 Power on.

2 Press USB-DAC to switch the
input source to "USB-DAC".

**3** Set the audio signal destination to this unit on the computer.

Windows OS

① Click the "Start" button and click "Control Panel" on the PC.
  • The control panel setting list is displayed.
② Click the "Sound" icon.
  • The sound menu window is displayed.

③ Check that there is a checkmark next to "Default Device" under in "PMA-1700NE" of the "Playback" tab.
- When there is a checkmark for a different device, click "PMA-1700NE" and "Set Default".

④ Select "PMA-1700NE" and click "Properties".
- The PMA-1700NE properties window is displayed.

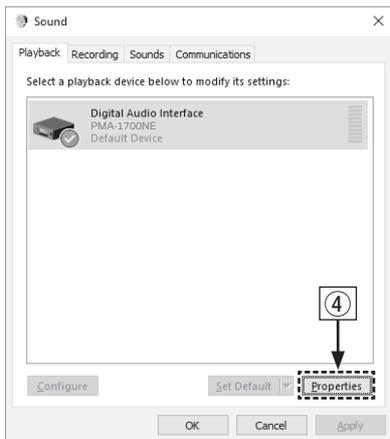

⑤ Click the "Advanced" tab.

⑥ Select the sampling rate and bit rate to be applied to the D/A converter.
- It is recommended that "2 channel, 32 bit, 192000 Hz (Studio Quality)" is selected.

⑦ Click "Apply".

⑧ Click "Test".
- Check that audio from this unit is output from the PC.
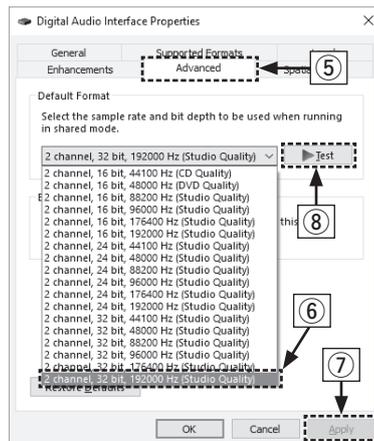

macOS

System requirements: macOS 11 or 12

① Move the cursor to "Go" on the computer screen, and then click "Utilities".
   • The utility list is displayed.
② Double-click "Audio MlDI Setup".
   • The "Audio Devices" window is displayed.
③ Check that "Use This Device For Sound Output" is checked in "PMA-1700NE".
   • If a different device is checked, select and "Secondary click" on "PMA-1700NE", and then select "Use This Device For Sound Output".

④ Select the "PMA-1700NE" format.
   • It is normally recommended to set the format to "2 ch 32-bit Integer 384.0 kHz".
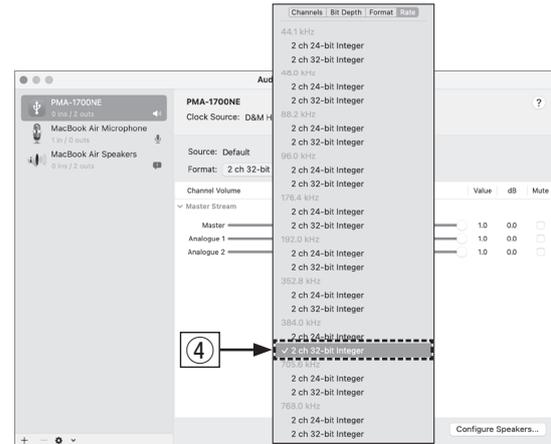

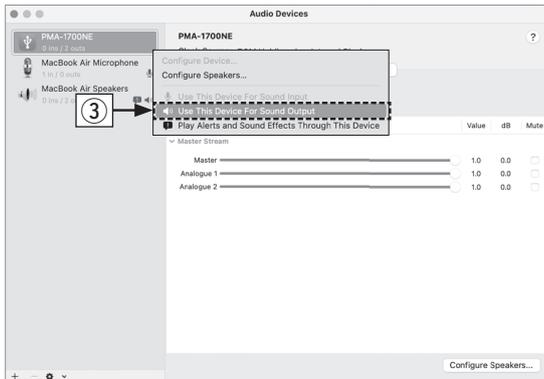

⑤ Quit Audio MlDI Setup.

4 Use your favorite music applications on your PC/Mac to play audio through the PMA-1700NE.
- For high resolution audio playback you will need to obtain an advanced audio player software such as JRiver Media Center or Audirvana.
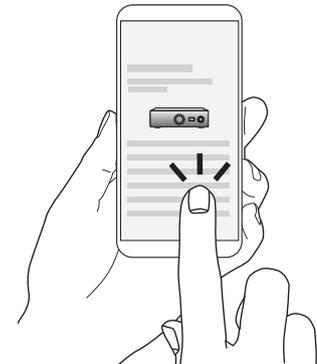

NOTE
Additional settings to output audio to the PMA-1700NE may have to be selected in your advanced audio player application. Please refer to the user's manual for your application.
